Some suggestions to read

Books on geographical education published after 2000

IGU Commission on Geographical Education

April 2016

Where can you go to for help and support when starting out in geography education? The IGU Commission on Geography Education have compiled a list of publications below to help any newcomers to the field. The list is not meant to be exhaustive or representative of the field, but we hope that it can be viewed as a starting point. The list will be updated periodically. Check out the Commission Newsletter for a regular update of new publications relevant to geography education, see www.igu-cge.org. The list below is an initial list of books on geographical education published after 2000. Apart from this list we recommend our own journal International Research in Geographical and Environmental Education.

Maud, A. (2014) *Understanding and Teaching the Australian Curriculum: Geography for
Primary Schools. Moorabbin: Hawker Brownlow Education.
